## SUBJECT INDEX

### Blood banking

Competitive strategies for the changing world of blood banking. July 61  
Strategic management in blood banking. October 48  
A timed blood ordering system. October 61

### Career development

On the road with a consulting technologist. May 31  
Creating career choices: Advice from an MT turned entrepreneur. June 30  
Mentoring: A tool for career development. August 71  
An MT makes the move to a doctors' office lab. September 61  
Now is career decision time for MTs. December 47

### Communication

The VA computer system goes on line. January 52  
Burnout in the lab: Symptoms, stages, strategies. March 26  
Safeguarding your union-free status. May 57  
Creating career choices: Advice from an MT turned entrepreneur. June 30  
When and how to argue. June 55  
A guide to writing winning proposals. June 71  
A cost-effective emergency room laboratory. July 28  
How to defuse legal dynamite in the lab. November 30  
Debugging a laboratory outreach program. November 65  
An LIS is not all pluses. November 75  
The Winners of MLO's Article Awards Contest. November 81

### Computers

How technology transfer is changing lab medicine. January 26  
The VA computer system goes on line. January 52  
Computer dialog: How to succeed with a lab-hospital interface. January 85  
Computer dialog: Trends in microcomputer-based lab systems. February 77  
Computer dialog: A look at packaged microcomputer systems. March 81  
Computer dialog: How a spreadsheet simplifies scheduling. April 65  
Computer dialog: Creating a calibration data base. May 63  
Computer dialog: Integrated software: A quick way to audit turnaround time or paid hours. June 81  
MBO monitored by computer. July 45  
Computer dialog: What should go into a lab computer contract. July 85  
How we computerized our microbiology reporting. August 53  
Computer dialog: A program for bar graphs of lab activity. August 85  
Computer dialog: A shopping list for microcomputer hardware. September 83  
Computer dialog: Key attachments for your microcomputer. October 75

An LIS is not all pluses. November 75  
Computer dialog: Quicker QC on a small microcomputer. November 87  
The impact of DRGs after year 3: How labs continue to cope. December 33  
Computer dialog: A microcomputer test-costing program. December 66

### Continuing education

A helping hand from MTs to office lab staffs. January 35

### Financial management

A viable DRG path for small hospital laboratories. January 81  
Washington report: Conferees agree on lab fee ceilings in midst of budget morass. February 21  
Trends in new laboratory arrangements. February 26  
Case history of a lab consolidation. Part I. February 33  
Case history of a lab consolidation. Part II. February 39  
Practical cost savings in microbiology. March 32  
Making organism identification cost-effective. March 55  
Improving lab business via a client satisfaction survey. March 61  
Is that new instrument a winner? April 24  
Moving a university hospital lab off-site. April 32  
The rising trend in outpatient testing. May 24  
Case history: One hospital's marketing success. May 51  
Washington report: COBRA coils for strike against clinical lab fees. June 25  
A cost-effective emergency room laboratory. July 28  
Competitive strategies for the changing world of blood banking. July 61  
Analyzing and reducing laboratory quality costs. October 41  
Debugging a laboratory outreach program. November 65  
An LIS is not all pluses. November 75  
The impact of DRGs after year 3: Doing more with less. December 26  
The impact of DRGs after year 3: How labs continue to cope. December 33  
Computer dialog: A microcomputer test-costing program. December 66

### Foreign laboratories

Viewpoint: Across the Pacific, the same lab concerns. June 19  
A medical technologist in central Africa. June 47  
Earthquake! MT duty on a medical aid team. September 75

### Government relations

Washington report: CAP, physician groups push to develop office testing standards. January 21  
Washington report: CAP bid for deemed status back on hold. March 21

JIM-SERUM / DL	C-7 C-8 C-9	141 141 141	10 13 8

Washington report: Congress still intent on fee schedules as budget focus shifts to 1987. April 19  
Washington report: Pathologists make strides toward nontraditional testing standards. May 19  
Washington report: Laboratories fare well under revised hospital regulations. August 25  
Washington report: Pre-election flurry leaves lab interests scrambling. November 25

### Inspection and accreditation

Viewpoint: Making the best of laboratory inspections. January 17  
Washington report: CAP, physician groups push to develop office testing standards. January 21  
Problem solving and decision making with proficiency data. February 46  
Washington report: CAP bid for deemed status back on hold. March 21  
Washington report: CAP again close to deemed status award. April 20

## Subject, Author Index

### Instruments

How technology transfer is changing lab medicine. January 26  
A viable DRG path for small hospital laboratories. January 81  
Problem solving and decision making with proficiency data. February 46  
Is that new instrument a winner? April 24  
A rational way to select a chemistry analyzer. July 34  
A single-instrument approach to TDM and toxicology. July 53  
"This machine isn't working." August 77  
Quality control in the new environment: Automated hematology. November 49

### Laboratory of the future

How technology transfer is changing lab medicine. January 26  
Health care macro trends and the laboratory's future. January 45

### Labor relations

Safeguarding your union-free status. May 57

### Legal problems

Washington report: Caution advised in relations with laboratory referral sources. July 23  
Giving a deposition in a malpractice suit. September 39  
How to defuse legal dynamite in the lab. November 30  
Washington report: Court rules on lab directors. December 22

### Maintenance

"This machine isn't working." August 77

### Management techniques

Japanese QC techniques merit our attention. January 76  
Viewpoint: Survival through expert power. February 17  
A guide to management by exception. February 59  
Collaborative negotiation: Getting agreements that last. February 70  
Burnout in the lab: Symptoms, stages, strategies. March 26  
Participative management lifts lab productivity. April 46  
The overdependent supervisor. April 61  
When and how to argue. June 55  
MBO monitored by computer. July 45  
Viewpoint: Is the sky really falling? August 21  
The androgynous blend: Recipe for a perfect supervisor? August 46  
Viewpoint: Recipe for a successful lab manager. September 21  
Do you have an "intrapreneur" in your lab? September 48  
Guidelines for disciplinary action. September 53  
How to be a winning manager. September 69  
Viewpoint: Using a team approach in hiring. October 21  
Creating job standards for a merit pay plan. October 30  
Strategic management in blood banking. October 48  
Where and how to improve laboratory operations. October 68  
Viewpoint: Why are our jobs so difficult? November 21  
Setting up a system of pay for performance. November 39  
Viewpoint: Making CAP workload recording work for you. December 19

### Patient relations

Are we drawing too much blood? March 75  
Viewpoint: Our envoys to the outside world. July 19  
We placed glucose monitors in our phlebotomists' pockets. July 77

### Personnel management

Viewpoint: Survival through expert power. February 17  
Collaborative negotiation: Getting agreements that last. February 70  
Viewpoint: Managing a graying work force. March 17  
Burnout in the lab: Symptoms, stages, strategies. March 26  
A supervisor evaluation form for today's lab. March 45  
Is your lab closing these gaps in staff potential? March 70  
Viewpoint: Employees are people, too. April 17  
Participative management lifts lab productivity. April 46  
When and how to argue. June 55  
Viewpoint: Our envoys to the outside world. July 19  
The androgynous blend: Recipe for a perfect supervisor? August 46  
Mentoring: A tool for career development. August 71  
Do you have an "intrapreneur" in your lab? September 48  
Guidelines for disciplinary action. September 53  
Creating job standards for a merit pay plan. October 30  
Setting up a system of pay for performance. November 39

### Problem solving

Ten-hour shifts solved our turnover problem. January 61  
Problem solving and decision making with proficiency data. February 46  
A cost-effective emergency room laboratory. July 28  
How we computerized our microbiology reporting. August 53  
Do you have an "intrapreneur" in your lab? September 48

### Productivity

Practical cost savings in microbiology. March 32  
Participative management lifts lab productivity. April 46  
A single-instrument approach to TDM and toxicology. July 53  
Setting up a system of pay for performance. November 39  
The impact of DRGs after year 3: Doing more with less. December 26  
The impact of DRGs after year 3: How labs continue to cope. December 33

### Professional relations

On the road with a consulting technologist. May 31  
Viewpoint: Our envoys to the outside world. July 19  
Washington report: Caution advised in relations with laboratory referral sources. July 23  
The impact of DRGs after year 3: How labs continue to cope. December 33

### Purchasing

A rational way to select a chemistry analyzer. July 34  
Computer dialog: What should go into a lab computer contract. July 85  
Computer dialog: A shopping list for microcomputer hardware. September 83  
Computer dialog: Key attachments for your microcomputer. October 75

### Quality control

Washington report: Medicare debate draws to a close. January 22  
A helping hand from MTs to office lab staffs. January 35  
Japanese QC techniques merit our attention. January 76  
Problem solving and decision making with proficiency data. February 46  
Auditing transcription errors: A spot check for lab performance. April 52  
A primer for proficiency testing. June 39  
We placed glucose monitors in our phlebotomists' pockets. July 77  
Self-testing: A big future? August 32  
Quality control in the new environment. September 30  
Quality control in the new environment: Clinical chemistry. September 32  
Giving a deposition in a malpractice suit. September 39  
Analyzing and reducing laboratory quality costs. October 41  
Quality control in the new environment: Ligand assay and TDM. October 55  
Quality control in the new environment: Automated hematology. November 49  
Quality control in the new environment: Statistics. December 51

### Record keeping

How we computerized our microbiology reporting. August 53  
How to defuse legal dynamite in the lab. November 30

### Regulation

Washington report: CAP, physician groups push to develop office testing standards. January 21  
Washington report: Medicare debate draws to a close. January 22  
Washington report: Conferees agree on lab fee ceilings in midst of budget morass. February 21  
Washington report: CAP bid for deemed status back on hold. March 21  
Washington report: Congress still intent on fee schedules as budget focus shifts to 1987. April 19  
Washington report: Pathologists make strides toward

nontraditional testing standards. May 19  
 Washington report: COBRA coils to strike against clinical lab fees. June 25  
 Washington report: Caution advised in relations with laboratory referral sources. July 23  
 Washington report: Competitive bidding moves slowly ahead. July 24  
 Washington report: Laboratories fare well under revised hospital regulations. August 25  
 Washington report: Ruling may allow challenges to payment methods. August 26  
 Washington report: Congress prepares to strengthen fraud and abuse sanctions. September 25  
 Washington report: Prompt pay bill also may pass Congress. September 26  
 Washington report: HCFA setting its agenda for reforms to seek in 1988. October 25  
 Washington report: Pre-election flurry leaves lab interests scrambling. November 25  
 How to defuse legal dynamite in the lab. November 30  
 Washington report: Final budget reconciliation a mixed bag for health care providers. December 20  
 Washington report: Court rules on lab directors. December 22

## Safety

AIDS and the lab: Infection control guidelines. February 53  
 Viewpoint: How serious are you about lab safety? May 17  
 Test your knowledge of AIDS: A self-quiz. August 40

## Salaries

Salary talk: When and how. April 43  
 Creating job standards for a merit pay plan. October 30  
 Setting up a system of pay for performance. November 39

## Scheduling

Ten-hour shifts solved our turnover problem. January 61  
 Night shift: Problems and coping strategies. August 63

## Staffing

Ten-hour shifts solved our turnover problem. January 61  
 Our mini-screen for drug abuse testing. May 37  
 The impact of DRGs after year 3: Doing more with less. December 26  
 The impact of DRGs after year 3: How labs continue to cope. December 33

## Technical procedures

How technology transfer is changing lab medicine. January 26  
 A lab program to do bedside glucoses. January 69  
 Problem solving and decision making with proficiency data. February 46  
 New roles for the urine dipstick. February 63  
 Practical cost savings in microbiology. March 32  
 Making organism identification cost-effective. March 55  
 Are we drawing too much blood? March 75  
 Our mini-screen for drug abuse testing. May 37  
 A single-instrument approach to TDM and toxicology. July 53  
 We placed glucose monitors in our phlebotomists' pockets. July 77  
 Self-testing: A big future? August 32

## Training programs

A helping hand from MTs to office lab staffs. January 35  
 Is your lab closing these gaps in staff potential? March 70  
 Viewpoint: Across the Pacific, the same lab concerns. June 19  
 We placed glucose monitors in our phlebotomists' pockets. July 77

## Workload management

An alternative method for measuring workload. Part I. May 43  
 An alternative method for measuring workload. Part II. June 61  
 A single-instrument approach to TDM and toxicology. July 53  
 How we computerized our microbiology reporting. August 53  
 Viewpoint: Making CAP workload recording work for you. December 19  
 A large-scale screening program for colorectal cancer. December 39

Seeks a simplified benefit booklet. March 88

How to improve faulty patient ID system. April 69

Open communication through a closed door? April 69

Rushed staff issues illegible reports. April 70

Getting the lab manager to listen. April 70

Troubled by front-desk employee's accent. May 68

Making satellite labs part of the team. May 68

How much to tell staff about lab's future. June 88

Repairing a broken communication line. July 92

Lacks procedures on storage, troubleshooting. September 90

Should lab disclose client data in merger talks? October 82

Faulty communication under dual management. November 89

### Developing employees

Technician has severely low self-esteem. February 88

Night employee shirks nontechnical tasks. February 90

What to do with employee who can't keep pace. June 86

Supervisor shrinks when ideas are criticized. November 93

### Discipline

Employees defy order to work during hurricane. August 92

Employee keeps letting his supervisor down. September 90

### Fringe benefits

Seeks a simplified benefit booklet. March 88

Vacationing supervisors told to stay in touch. July 92

Will new vacation limit turn off employees? July 94

Any standards for hospital employee physical exams? August 92

### Hiring and firing

Firing the oldest: Is it age discrimination? August 94

Lab can learn much from loss of valued employee. December 71

Is a verbal promise of a permanent job binding? December 71

### Housekeeping

Worried about instrument damage in relocation. May 68

### Interdepartmental relations

Manager seeks ways to survive a merger. February 87

How to improve faulty patient ID system. April 69

Rushed staff issues illegible reports. April 70

Purchasing unit overrules lab instrument choice. April 72

Making satellite labs part of the team. May 68

Pricing debate blocks outpatient marketing. October 79

How fast should Stat service be for the ER? October 82

Any constraints on x-ray, respiratory work by MTs? November 93

The battle against excess test orders. December 69

### Labor relations

Union overlooks needs of professional employees. September 87

### Legal

Is it legally risky to test for a zoo? January 89

Free speech at issue in hospital newsletter. January 90

Is a patient release needed for research testing? February 87

AIDS disclosure and confidentiality. March 87

Needs legal advice on testing for nursing homes. April 69

Can lab copy commercial software? April 70

Troubled by front-desk employee's accent. May 68

Manager takes limited action in harassment case. June 85

Lab blamed for not doing follow-up procedure. June 88

Can lab use overseas kits unapproved by FDA? July 92

Firing the oldest: Is it age discrimination? August 94

Warns doctor against test, sued by patient anyway. August 94

Must lab give employee same job after long illness? October 80

Lab staff wants hospital to identify AIDS patients. November 91

Is a verbal promise of a permanent job binding? December 71

### Morale

Morale drop feared if supervisor is demoted. May 67

Staff resists new analyzer as threat to jobs. July 91

Lab staff faces end to independent research. July 94

Staff reaction troubles lab employee with AIDS. August 91

When a hospital lab faces possible takeover. November 89

### Motivation

How to motivate the clerical staff. May 70

Should lab post lists of staff errors? December 69

### New supervisor

New supervisor wants staff's acceptance. May 70

New supervisor bypassed when problems arise. August 94

### On call

Vacationing supervisors told to stay in touch. July 92

Extra pay for on-call status? July 92

### Problem employee

Supervisor overruled, must keep employee. February 88

Technician has severely low self-esteem. February 88

Night employee shirks nontechnical tasks. February 90

Frequent bench absences: Illness or boredom? February 90

How to deal with an alcoholic employee. March 87

Instrument expert won't train others after hours. March 88

Manager takes limited action in harassment case. June 85

What to do with employee who can't keep pace. June 86

Employee leaves work undone at quitting time. June 86

Moonlights at second lab but won't follow procedures. August 91

Employee keeps blowing whistle on her lab. September 88

Employee keeps letting his supervisor down. September 90

Home for the holidays—and AWOL from the lab. October 80

Do problem employees overshadow good workers? October 80

Clique complains, raps others in lab. October 82

Goes over supervisor's head with work complaints. November 91

Problem supervisor

Supervisor complains to harass employee. January 89

The bad habits of good managers. February 87

Getting the lab manager to listen. April 70

Sexism blamed for conflict with administrator. May 67

Manager's shop talk at lunch turns off others. June 85

Boss concerned about employee's personal life. September 87

Supervisor hogs proficiency testing. September 87

Supervisor shies away from supervising. September 88

Every dog has his day, but not in the lab. November 91

Supervisor shrinks when ideas are criticized. November 93

Lab director takes over employee counseling role. December 71

### Quality control

Supervisor hogs proficiency testing. September 87

Lab, manufacturer in dispute over labeling error. October 79

Checking on quality of work sent to reference labs. October 79

Is outdated method cause for survey failure? November 89

### Resource conservation

What to do with an old instrument. April 70

The battle against excess test orders. December 69

### Safety

Staff reaction troubles lab employee with AIDS. August 91

Any standards for hospital employee physical exams? August 92

Every dog has his day, but not in the lab. November 91

Lab staff wants hospital to identify AIDS patients. November 91

Where OSHA's proposed lab safety rules stand. December 70

### Salaries

Compensation survey draws few responses. January 90

Extra pay for on-call status? July 92

### Scheduling

Filling vacation gaps with temporary help. January 92

## Management Q & A, Tips, Washington Report Index

Can four employees handle 24-hour coverage? April 72

Can double shifts solve staffing shortages? June 85

### Self-development

The bad habits of good managers. February 87

### Staffing

Filling vacation gaps with temporary help. January 92

Can four employees handle 24-hour coverage? April 72

Can double shifts solve staffing shortages? June 85

Seeking adequate FTEs for sections lacking unit values. July 91

Extra pay for on-call status? July 92

Lab is short-staffed as vacation deadline nears. September 88

Home for the holidays—and AWOL from the lab. October 80

### Supplier relations

Purchasing unit overrules lab instrument choice. April 72

Lab held accountable for item missing in delivery. May 67

Lab, manufacturer in dispute over labeling error. October 79

### Technical protocols

Can lab use overseas kits unapproved by FDA? July 92

When clinician omits usual follow-up tests. September 90

### Training

Instrument expert won't train others after hours. March 88

Waste of time to ease computer fright? June 86

What to do with employee who can't keep pace. June 86

Any constraints on x-ray, respiratory work by MTs? November 93

### Workload management

Seeking adequate FTEs for sections lacking unit values. July 91

## TIPS ON TECHNOLOGY INDEX

Acid phosphatase stability. November 13

AIDS precautions. March 11

ALP vs. GGT as a screening test for children. December 14

Antibiotic susceptibility in asymptomatic patients. April 11

Anticoagulant test, lupus. January 12

Arterial lines, blood sampling from. June 11

Arterial lines, drawing from. January 12

Beta HCG testing. May 14

Bilirubin. December 13

Blood gas controls. September 14

Blood products, prewarming. November 14

Blood sampling from arterial lines. June 11

Blood transfusions and test results. May 11

Blood volume test. September 13

CBC results and EDTA. August 13

Cholesterol testing. November 14

Citrate levels, urinary. October 16

Clean-catch urines. February 11

Coagulation mixing studies. February 14

Coagulation testing and lipemia. October 16

Coagulation testing and polycythemia. December 13

Coagulation time, Lee-White. November 16

Computer programs for drug levels. April 11

Controls, blood gas. September 14

Controls, expiration date of. March 12

Cord blood specimens. August 16

C-reactive protein. October 14

CSF, neonatal. July 14

CSF testing for serology. March 14

Culture, placenta. January 11

Culture, urine. July 12

Cystic fibrosis testing and low sweat producers. October 13

Differentials on special specimens. January 14

Drawing from arterial lines. January 12

Drug levels, computer programs for. April 11

Drug values, psychotherapeutic. January 14

Duplicate PTs and PTTs. September 14

EDTA and CBC results. August 13

Effect of storage on urine culture. July 12

Electrolyte testing. February 12

Electrophoresis, hemoglobin. July 11

Elevated potassium and serum separation tubes. April 14

Eosinophil counts on sputum. September 13

Eosinophils, urine. August 16

Expiration date of controls. March 12

Fasting and lipid values. May 11

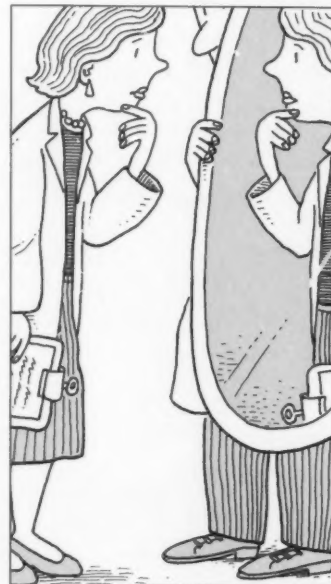

Foot veins, use of. November 13

GGT vs. ALP as a screening test for children. December 14

HCG, beta. May 14

Hematuria and exercise. September 16

Hemoglobin electrophoresis. July 11

Hemoglobin, plasma. December 14

Heparin and specimen collection. December 16

IV contamination. February 12

Laxatives, stool test for. September 13

Lee-White coagulation time. November 16

Lipemia and coagulation testing. October 16

Lipid values and fasting. May 11

Low sweat producers and cystic fibrosis testing. October 13

Lupus anticoagulant test. January 12

Macrocytes vs. microcytes. March 14

MCV results, quality control on. October 13

Microcytes vs. macrocytes. May 14

Neonatal CSF. July 14

Osmolality methods. June 12

Placenta cultures. January 11

Plasma hemoglobin. December 14

Polycythemia. December 13

Porphyria, screening tests for. June 12

Post-dose blood sampling. June 11

Potassium, elevated, and serum separation tubes. April 14

Potassium/sodium analyses and viscosity. August 14

Prewarming blood products. November 14

Propidium iodide. July 11

Protein. December 13

Prothrombin time standardization. July 12

Psychotherapeutic drug values. January 14

PT and PTT. May 14

PT, PTT, and polycythemia. December 13

PTs and PTTs, duplicate. September 14

Quality control on MCV results. October 13

Reference method for simple strip testing. December 13

Reticulocyte counts. June 14

Sand bath. October 16

Screening tests for porphyria. June 12

Slide stainer problems. August 13

Sodium/potassium analyses and viscosity. August 14

Special storage for VDRL testing. October 14

Specimen collection and heparin. December 16

Sputum, eosinophil counts on. September 13

Stability of acid phosphatase. November 13

Standardization of prothrombin time. July 12

Stool for reducing substances. November 16

Stool test for laxatives. September 13

Stool urobilinogen. December 14

Susceptibility, antibiotic. April 11

Sweat test. October 13

Testing CSF for serology. March 14

Transfusions and test results. May 11

Urinary citrate levels. October 16

Urine culture, effect of storage on. July 12

Urine eosinophils. August 16

Urine protein. December 13

Urine, clean-catch. February 11

Urine testing and vitamin C. January 11

Urobilinogen. June 14

Use of foot veins. November 13

VDRL testing, special storage for. October 14

Venipuncture needles. December 16

Viscosity and sodium/potassium analyses. August 14

Vitamin C and urine testing. January 11

## WASHINGTON REPORT INDEX

CAP, physician groups push to develop office testing standards. January 21

Medicare debate draws to a close. January 22

Conferees agree on lab fee ceilings in midst of budget morass. February 21

Bowen confirmed as secretary of HHS. February 22

CAP bid for deemed status back on hold. March 21

Congress still intent on fee schedules as budget focus shifts to 1987. April 19

CAP again close to deemed status award. April 20

Pathologists make strides toward nontraditional testing standards. May 19
